INDIA  
SHOW  
2025**

This year's DesignIndia Show explores the theme "empower," a call to deepen our understanding of how design, and designers, can drive meaningful change across disciplines, sectors, and societies.

To empower is to enable. It is about giving voice, tools, confidence, and direction to individuals, systems, and ideas, so they may grow, act, and transform.

Design has always been a quiet but powerful force, reshaping habits, improving lives, and making the invisible visible. But in today's rapidly evolving world, it must do more. Designers are no longer just problem-solvers, they are change agents, culture shapers, and vision builders.

At the DesignIndia Show, "empower" becomes the lens through which we examine:

- How design practices can empower businesses to innovate.
- How design education must evolve to empower the next generation.
- How inclusive design can empower communities, voices, and identities.
- How designers themselves can be empowered to take leadership roles in shaping futures.

This theme is not just about potential, it's about responsibility.

To empower is not a choice, it's a necessity for any change
